

Where We Stand in Early Childhood

Alignment of National Indicators and Key Policies for Nevada's Early Childhood System

Each year, multiple national organizations compile data on the status of children and grade or rank states based on where they stand compared to the other states. The purpose is not to shame states that are doing poorly, but to identify where states have opportunities to improve, as well as to identify key policies and strategies – utilizing data and examples from high performing states – on what can be done to improve these measures. This analysis looks at five of these national reports addressing indicators focused on the early childhood population in Nevada.

Nevada's Grade: G

The *State of Babies Yearbook: 2023* is part of ZERO TO THREE's *Think Babies™*. ZERO TO THREE created *Think Babies* to make the potential of every baby a national priority. The data and indicator analysis in the *Yearbook* are powered by Child Trends, the nation's leading nonprofit research organization focused exclusively on improving the lives and prospects of children, youth, and their families.

prenatal-to-3 policy IMPACT CENTER 2023 Prenatal-to-3 State Policy Roadmap

RESEARCH FOR ACTION AND OUTCOMES

The Prenatal-to-3 State Policy Roadmap guides state leaders on the most effective investments to ensure all children thrive from the start. Grounded in the science of the developing child and based on the most rigorous evidence available, the Roadmap details the state action that foster the nurturing environments infants and toddlers need, and that reduce longstanding racial, ethnic, and socioeconomic disparities in access and outcomes. <https://pn3policy.org/pn-3-state-policy-roadmap-2023/nv/>

- 3 of 12 Effective Policies & Strategies
- 24th – Impact of Policy Choices on Family Resources

The State of Preschool Yearbook has annually tracked state-funded preschool program funding, access, and policies since the 2001-2002 school year. The Yearbook seeks to improve the public's knowledge and understanding of state efforts to expand the availability of high-quality education to young children. https://nieer.org/wp-content/uploads/2023/05/Nevada_YB2022.pdf

The 34th edition of the Annie E. Casey Foundation's *KIDS COUNT® Data Book* describes how the country's lack of affordable and accessible child care negatively affects children, families and U.S. businesses. This year's publication continues to present national and state data across four domains — economic well-being, education, health and family and community — and ranks states in overall child well-being. The report includes pre-pandemic figures as well as more recent statistics, and shares the latest information of its kind available.
